

Habeba Ehab

Full-Stack React & Node.js Developer — AI-Powered Web Applications

Egypt | Phone: 01122323649 | Email: habebaehab165@gmail.com

LinkedIn: [linkedin.com/in/habeba-ehab-ebrahimm](https://www.linkedin.com/in/habeba-ehab-ebrahimm) | Portfolio: habebaehab.tech | GitHub: github.com/codestcode

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building production-grade, AI-powered web applications using React.js, Next.js, Node.js, and Supabase. Proven ability to deliver scalable, user-focused solutions for real clients, including secure admin dashboards, marketplace platforms, and restaurant websites. Experienced coding instructor teaching 20+ students and driving a measurable 30% improvement in problem-solving skills. Passionate about modern UI/UX, performance optimization, and end-to-end product ownership.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion, Redux Toolkit, HTML, CSS, React Router, Vite, GSAP, i18next

Backend & Databases: Node.js, Express.js, Supabase (RLS, Storage), Firebase, PostgreSQL, Drizzle ORM, MongoDB, MySQL, SQL

Tools & Platforms: Git, GitHub, Vercel, RESTful APIs, AI API Integration, Chrome Extensions (Manifest V3), PWA, Cloud Hosting

Programming Languages: C++, Python, C#, Algorithms & Data Structures

PROFESSIONAL EXPERIENCE

Front-End Instructor

Egypt | Jun 2026 – Present

NEXORA Academy – Hybrid

- Delivering a structured front-end development curriculum covering HTML, CSS, JavaScript, and React.js to beginner and intermediate learners in a hybrid learning environment.
- Designing hands-on project-based lessons that bridge theoretical concepts with real-world application, improving student retention and practical skills.
- Mentoring students through code reviews and individual feedback sessions, fostering problem-solving thinking and industry-ready development habits.

Coding Instructor

Remote | 2025 – Present

iSchool – Kids Coding Education Platform

- Delivered structured coding curricula to young learners using age-appropriate pedagogical methods, maintaining high student engagement and positive outcomes across hybrid sessions.
- Designed interactive lesson plans covering programming fundamentals, logical thinking, and problem-solving, adapting content to different skill levels and learning paces.
- Managed classroom dynamics for groups of 20+ students, applying communication strategies that improved student comprehension and course completion rates.

Freelance Full-Stack Developer

Remote | 2024 – Present

Self-Employed

- Delivered 7+ production-ready client applications using React.js, Next.js, Node.js, Express.js, Supabase, and Firebase, integrating secure authentication, admin dashboards, and payment flows.
- Built Shark Steel, a full Arabic RTL e-commerce platform with a Node.js/Express backend, Row-Level Security, Supabase Storage, and transactional email, serving a premium furniture brand in production.
- Developed Pharmatish, a multi-pharmacy marketplace featuring advanced search, prescription upload, real-time order tracking, and a wallet/points system, achieving a production-ready MVP planned for commercial deployment.

Problem Solving Instructor

Kafr El-Sheikh, Egypt | 2024 – Present

HIMIT Problem Solving Community

- Designed and delivered a structured algorithms and data structures curriculum in C++ and Python for 20+ students, driving an average 30% improvement in problem-solving performance.
- Led weekly hands-on workshops combining theoretical instruction with competitive programming exercises, accelerating student readiness for ICPC-style contests.
- Mentored students in applying optimized algorithmic solutions to real-world challenges, resulting in multiple students advancing to regional programming competitions.

React Front-End Trainee

Cairo, Egypt | Jun 2025 – Dec 2025

Digital Egypt Pioneers Initiative (DEPI) – Government-Backed Internship (Hybrid)

- Engineered responsive, API-integrated front-end projects using React.js, TypeScript, and JavaScript under structured mentorship, consistently delivering features on schedule.
- Collaborated with a cross-functional team of 10+ trainees to implement UI layouts and integrate third-party APIs using structured Git and GitHub workflows.
- Applied modern UI/UX principles across multiple projects, receiving positive evaluation for code quality, component

reusability, and accessibility standards.

EDUCATION

Bachelor of Computer Science

Higher Institute of Engineering and Technology

Kafr El-Sheikh, Egypt | 2023 – Present

GPA: 3.5 / 4.0 (Top 10%)

KEY PROJECTS

Featured Projects

Hirfa (*Arabic Home Services Marketplace*) | *Co-Founder & Lead Full-Stack Developer*

github.com/codestcode/hirfa | hirfa-five.vercel.app

- Co-founded and sole-engineered a full-stack mobile-first platform (Next.js App Router, TypeScript, PostgreSQL, Supabase Auth/RLS/Storage) with instant booking, price comparison, portfolio viewing, and real-time order tracking.
- Architected a custom RTL design system from scratch: Cairo typeface, Iron Blue + Ember Orange tokens, shadcn/ui overrides, and Tailwind CSS v4 logical properties resolving all bidirectional layout conflicts.
- Configured enterprise-grade repo security: GitHub Secret Scanning with push protection, CodeQL CI workflow, and branch protection rulesets on a split public/private repo; entered *Qabila Hackathon*.

Hirfa on: linkedin.com/company/hirfaapp | facebook.com/hirfaapp | x.com/HirfaAPP

EduSpark (*AI Chrome Extension for CS Students*) | *Sole Full-Stack Developer*

github.com/codestcode/Study-Sidebar

- Architected a Manifest V3 Chrome Extension (React, Vite, TypeScript) with isolated content scripts, persistent background service worker, and Chrome Storage API; backed by a Node.js/Express REST API with JWT auth, PostgreSQL, and Drizzle ORM for type-safe schema and migrations.
- Designed an AI prompt system across a 9-combination length/format matrix to optimize summarization quality; delivered quiz generation and contextual webpage chat via AI API integration.

SugarSense (*AI Diabetes Tracking App*) | *Sole Full-Stack Developer*

github.com/codestcode/sugersense | diabetestracker-two.vercel.app

- Built a mobile-first PWA (Next.js, TypeScript, Zustand, Tailwind CSS) for logging glucose readings, insulin doses, meals, and mood; integrated Gemini Vision API for multimodal meal photo analysis estimating nutritional and blood sugar impact.
- Diagnosed and resolved critical Node.js Buffer API incompatibilities with base64 image encoding pipeline and Turbopack/Windows build conflicts, stabilizing the core AI analysis feature in production.

Did I? (*Mental Health PWA*) | *Sole Developer*

github.com/codestcode/Did_i | did-i.vercel.app

- Built with Next.js, TypeScript, and Framer Motion; registered a PWA service worker for full offline support and cross-device installability without an app store.
- Architected a custom React Context + Hooks state layer with localStorage covering task CRUD, photo attachment, confirmation history, and archive/restore lifecycle; includes calm mode and dark mode with persisted user preferences.

Client & Freelance Projects

Pharmatish | *Sole Full-Stack Developer*

pharmatish.vercel.app

Multi-pharmacy marketplace (Next.js, TypeScript, Firebase Auth, Firestore) with prescription upload, real-time order tracking, wallet/points system, and a role-based admin dashboard.

Shark Steel | *Sole Full-Stack Developer*

sharksteel.shop

Arabic RTL furniture e-commerce (Next.js App Router, Tailwind CSS v4, Supabase Auth/RLS/Storage) with a secure admin dashboard for full product and category CRUD management.

Emad Afandi Coffee | *Sole Full-Stack Developer*

emadafandi.vercel.app

Full brand redesign (Next.js, Node.js, i18next AR/EN internationalization, GSAP scroll animations) with a complete RTL cart flow and bilingual content management.

Maguro Sushi | *Sole Full-Stack Developer*

susui.vercel.app

Premium restaurant site (Next.js, TypeScript, Redux Toolkit) with cart system, WhatsApp order integration, and table reservation flow.

ICPC Club Platform | *Sole Full-Stack Developer*

icpchimit.dev

MERN-stack university community platform (React, Next.js, TypeScript) with role-based access control, multi-week training roadmaps, and competitive programming resource hub.

Personal Projects

SyncFocus | Smart productivity dashboard (React 19, JavaScript, Firebase Realtime Database) for tracking habits, study sessions, expenses, and mood with data visualization. github.com/codestcode/syncfocus
